First published in 1994, this book brings together the papers presented at the International Forum on 'Future Visions of Urban Public Housing' held on November 17-20, 1994 in Cincinnati, Ohio. Participants included public housing officials, academics, practitioners and public housing residents who came together to debate, compare and analyse practices and issues in urban and public housing in industrialised nations. The 55 collected papers address the following key topics: public housing policy; comprehensive neighbourhood planning for public housing; public housing in the urban design context; quality of design standards and guidelines for public housing; resident participation and enhanced self-sufficiency in public housing; public housing alternatives; revitalising and rehabilitating public housing; the Elderly, Children, and special populations in public housing. The findings suggest new directions for policy and agendas for action.
